Jon Jiang

DevOps / SRE / Platform Engineer

Java backend engineer with about two years of experience maintaining and refactoring a banking report batch system, and contributing to an LLM-assisted COBOL-to-Java conversion PoC. Exposure to Kubernetes and deployment troubleshooting at work led me toward DevOps / SRE / Platform Engineering: I studied Kubernetes on my own, earned CKA, CKAD, RHCSA and AWS CLF-C02, and practice GitOps and observability on a k3s homelab. Looking for junior-level roles.

Experience

Backend Engineer | 萬事宜股份有限公司

2024/5 — 2026/6 · Taipei

- Helped partner vendors troubleshoot K8s deployment issues
- Maintained and refactored business logic in a banking report batch system
- Took part in a PoC applying LLMs to COBOL-to-Java conversion

Homelab Projects

crypto_trader_infra

k3s · ArgoCD · GitLab CI · Helm · Prometheus / Grafana · Loki

- GitLab CI pipeline (lint → test → build → update-manifest): builds images with rootless BuildKit and automatically bumps the image tag in the infra repo
- ArgoCD detects infra repo changes and syncs them to k3s automatically (prune / selfHeal); the app and PostgreSQL are managed as Helm charts
- Monitoring with kube-prometheus-stack, logging with Loki + Promtail (JSON log parsing); GitLab Runner runs in the cluster with the Kubernetes executor

gitops-homelab

k3s · ArgoCD · Kustomize · kube-prometheus-stack

- Manages cluster apps and config through ArgoCD's App-of-Apps pattern (root Application) with automated sync (prune / selfHeal)
- Runs kube-prometheus-stack with a local-path StorageClass so Prometheus and Grafana data persist
- Deploys the Online Boutique microservices demo (Kustomize + Ingress) as a practice environment

Skills

Kubernetes · Docker · Linux · Gitlab CI · ArgoCD · Prometheus · Grafana · Python · Java

Certifications

CKA · CKAD · RHCSA · AWS CLF-C02

Education

Chung Yuan Christian University | M.S. Electrical Engineering

2019/9 — 2023/9

- Research: attitude control of quadrotors
- Switched to software engineering after graduation, self-studying Java, Spring Boot and SQL for a backend career

Minghsin University of Science and Technology | B.S. Electrical Engineering

2015/9 — 2019/6
