Jon Jiang

DevOps / SRE / Platform Engineer

Java backend engineer with about two years of experience on a large bank's COBOL–to–Java system conversion: handled Dev/SIT deployments and first–line troubleshooting on an on–prem Kubernetes platform. Exposure to Kubernetes and deployment troubleshooting led me toward DevOps / SRE / Platform Engineering: I hold CKA, CKAD, RHCSA and AWS CLF–C02, and practice GitOps, CI and observability on a k3s homelab. Looking for junior–level roles.

Experience

Backend Engineer | 萬事宜股份有限公司

2024/5 — 2026/6 · Taipei

- Handled Dev/SIT deployments on an on–prem Kubernetes platform: triggered the existing CI/CD pipeline, edited Kubernetes YAML following the partner DevOps team's adjustments, and served as first responder on failed deployments, diagnosing CrashLoopBackOff and configuration errors with ELK and kubectl logs/describe.
- Optimized a batch job by replacing Java nested–loop filtering with SQL JOIN/WHERE; local test run time dropped from over an hour to about 10 minutes; shipped to production and accepted by the client.
- Ran daily report acceptance checks before go–live: used Python to extract fields by spec to locate differences, codified common causes into rules, and produced client acceptance reports.

Homelab build–out and job search

2026/6 — Present

Homelab Projects

gitops–homelab

k3s · ArgoCD · kube–prometheus–stack

- Manages cluster apps and config through ArgoCD's App–of–Apps pattern (root Application) with automated sync (prune / selfHeal)
- Runs kube–prometheus–stack with a local–path StorageClass so Prometheus and Grafana data persist

crypto_trader_infra (earlier environment, decommissioned)

k3s · ArgoCD · GitLab CI

- GitLab CI pipeline (lint → test → build → update–manifest): builds images with rootless BuildKit and bumps the image tag in the infra repo; ArgoCD detects the change and syncs it to k3s automatically

Skills

Kubernetes · Docker · Linux · Gitlab CI · ArgoCD · Prometheus · Grafana · Python · Java

Certifications

- CKA · 2026
- CKAD · 2026
- RHCSA · 2025
- AWS CLF–C02 · 2025

Education

Chung Yuan Christian University | M.S. Electrical Engineering

2019/9 — 2023/9

- Research: attitude control of quadrotors
- Switched to software engineering after graduation, self–studying Java, Spring Boot and SQL for a backend career

Minghsin University of Science and Technology | B.S. Electrical Engineering

2015/9 — 2019/6
